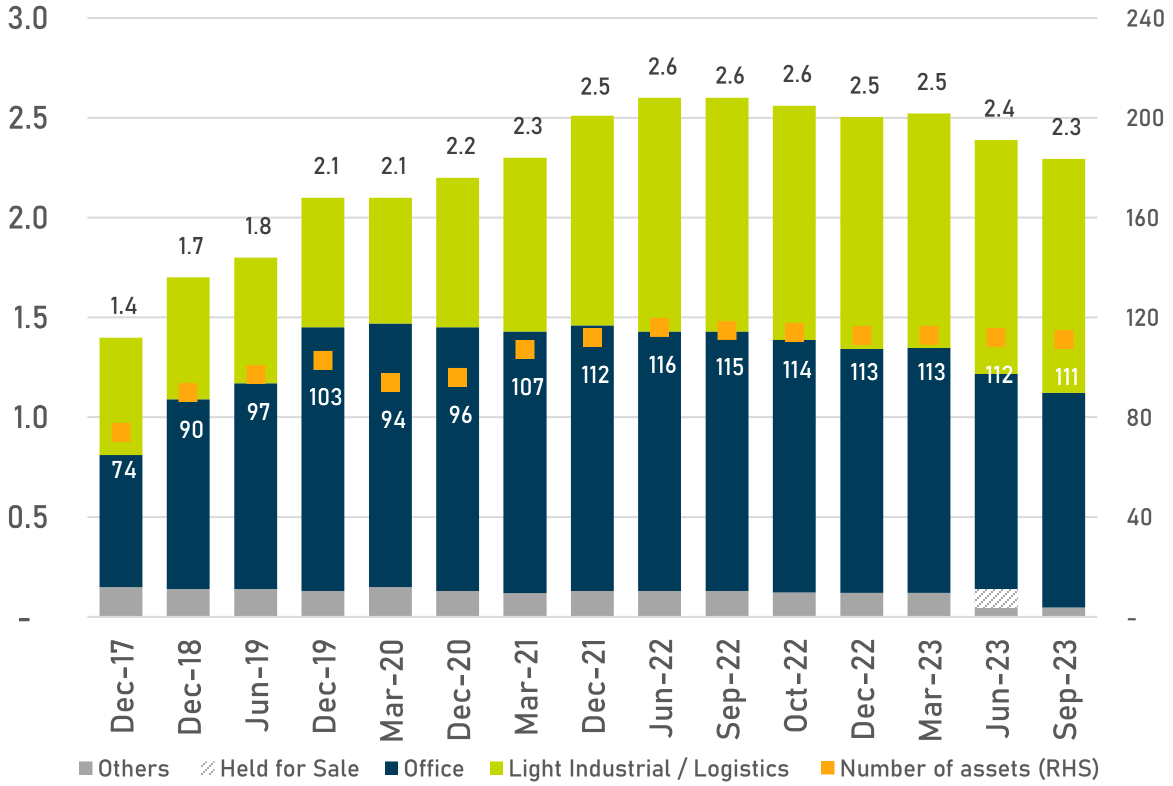
Executing on strategy: CEREIT is now 51%[1] light industrial / logistics

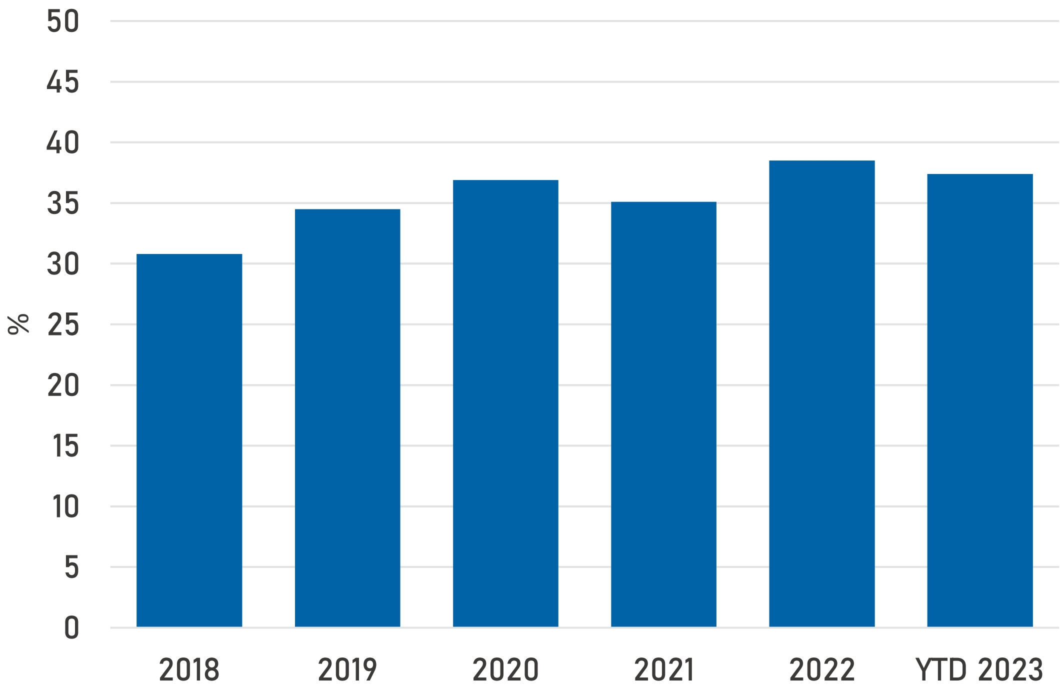
Assets sales to keep gearing within 35-40% Board Policy range and to fund asset enhancement initiative (AEI) program

- €229 million in seven divestments[2] since FY 2022 at a blended 13.7% premium to the most recent valuation
- €400 million divestment program over the next 2 to 3 years on track although the transaction environment is softer

Transactions track record



Historical net gearing ratio

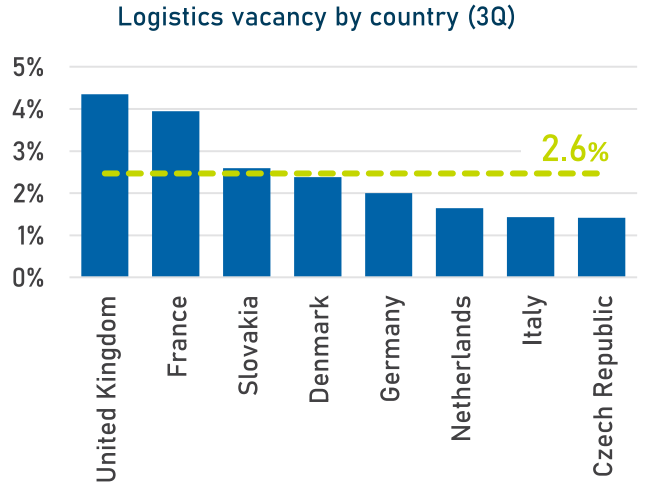


1. Including the sale of Viale Europa 95 which has been completed in October 2023
2. Two light industrial assets in Germany, one office asset in Finland, one light industrial asset in France, one office asset, a logistics unit and one non-core/other asset in Italy. With regards to the logistics unit in Italy, the sale was of a warehouse unit contained within the CLOM logistics asset in Italy for a consideration of €2.8 million (70% higher than the apportioned value of the most recent valuation as at 31 December 2021). The warehouse is approximately 3.5% of the asset's total lettable surface and previously leased to the buyer. The sale was completed on 25 January 2022

Structural shifts in Europe that impact CEREIT

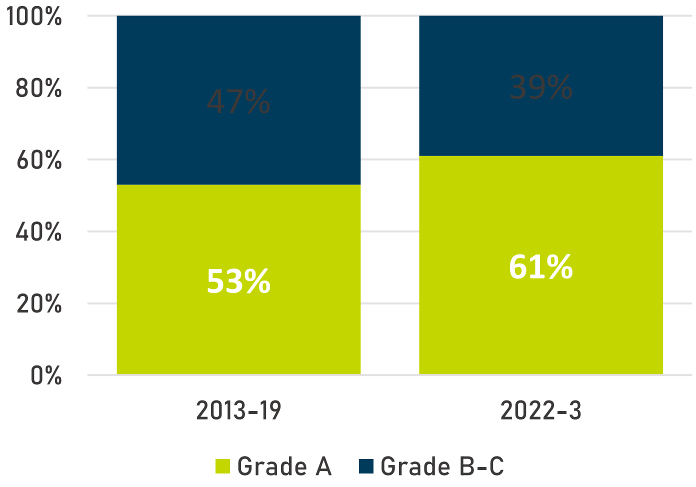
Ongoing adaptation to hybrid working, geopolitics and e-commerce adoption fuels demand for better logistics & office space

Growing demand for logistics



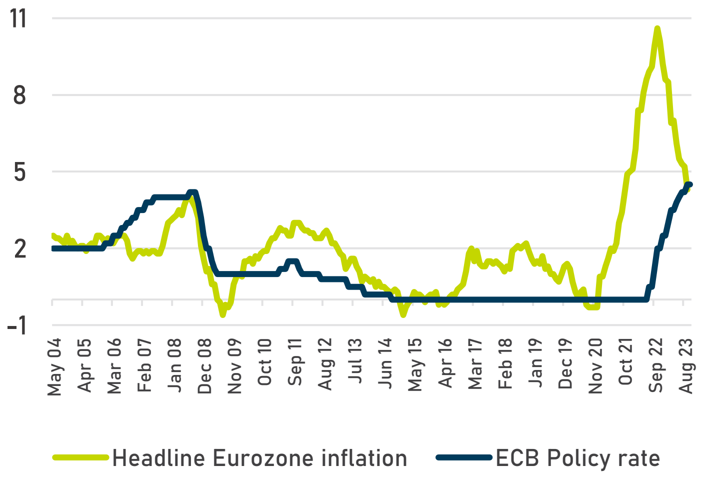
- The COVID-19 pandemic accelerated e-commerce growth, causing significant rise in logistics space take-up; growth has slowed but is expected to still consistently rise over the next few years[1]
- Occupier demand is bolstered by nearshoring and reshoring activity, as global supply chains are reconfigured to prioritise resilience over cost
- Strong demand, a limited pipeline and a focus on quality means prime vacancy remains extremely low (albeit slightly up sequentially to 2.6%)

Flight to quality in the office space



- Office occupiers have increasingly demanding specification requirements and are focusing on best-in-class space
- Occupiers plan to downsize their office size to reflect lower post-pandemic utilisation rates
- Working from home rates may have peaked, given that nearly two-thirds of companies expect a full return to the office within 3 years

Higher interest rates causing slowdown



- Unprecedented tightening of monetary policy over the last year led to jump in financing costs
- 3M Euribor has increased by close to 300 bps (3%) in just over a year[3]
- All this has put more emphasis on the importance of interest rate hedging and debt maturity management

Financial performance and capital management

3Q 2023 financial results summary

On a like-for-like basis[1], 3Q 2023 NPI was only 2.2% lower than 2Q 2023

Financial performance (Selected Line Items)	3Q 2023 €'000 (Unless stated)	2Q 2023 €'000 (Unless stated)	Fav./ (Unfav.)

Indicative DPU (€ cents)	**4.005**	**3.888**	**3.0%**

Commentary

- NPI was lower mainly due to lower income due to the sale of Piazza Affari 2, higher expenses which included provisions for rental adjustment claims by the Italian government, higher service charge expenses and non-recoverable expenses of which a portion has been received through service charge income
- Net interest costs (excluding amortised establishment costs) were 8.8% lower than the previous quarter as the debt fixed/hedging ratio remained at 91% and proceeds from the sale of Piazza Affari were used to repay the RCF, although total finance costs were a little higher
- DPU outperformance of 3% was largely driven by the release of a tax accrual previously made in the Netherlands which is now not required

1. Like-for-like includes normalising the provisions for rental adjustment claims by the Italian government

YTD 2023 financial results summary

On a like-for-like basis, YTD NPI was 2.1% higher than pcp[1]

Commentary

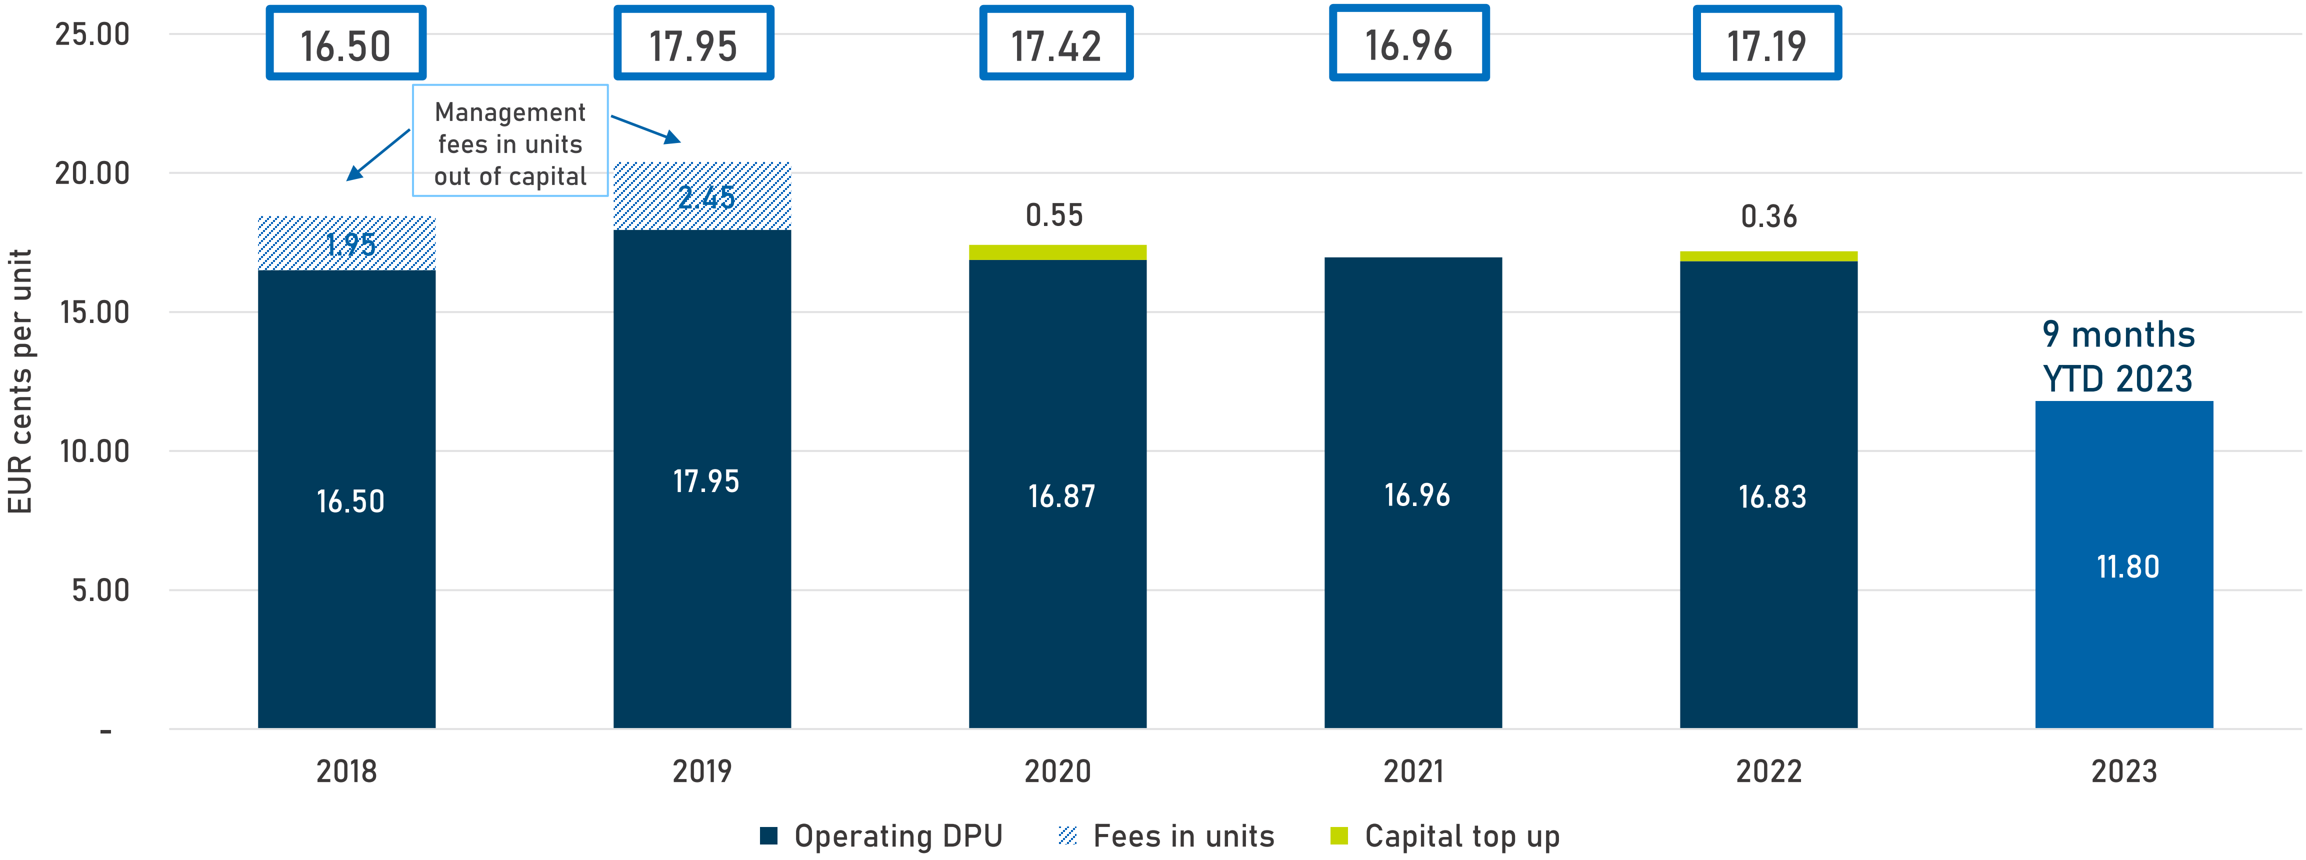
- NPI was 1.1% lower due to divestments, the now vacant site of Maxima in Rome under its strip out works , the 15% rent reduction mechanism claimed by Italian government and higher operating costs.
- Like for Like NPI was 2.1% higher.
- Finance costs were 52% higher due to higher average interest rate of 2.58% compared to 1.73% in the pcp resulting from higher 3M Euribor, higher margins from new loans and higher borrowings drawn down over the year
- Although headline indicative DPU was 9.2% lower, on a like-for-like basis the indicative DPU is only 4.1% lower than pcp

1. Like-for-like basis excludes acquisition, divestments and in YTD 2022 adjusts for absence of income from Nervesa 21 & Maxima due to redevelopment and strip out works respectively

6-year track record of stable distributions

Resilient like-for-like DPU even in the height of COVID-19 and amidst the current prolonged uncertainty in macroeconomic environment

Like-for-like DPU[1] History (Note: like-for-like DPU shown in the box at top)



1. Like-for-like DPU is based on the following assumptions: (a) Management Fees in Units that are added back for DPU calculation are excluded from 2018 and 2019, (b) Units in issue and DPU prior to the 5:1 Unit consolidation have been adjusted accordingly, (c) divestment gains paid out are included in like-for-like DPU and (d) 2018 DPU covers the period from 1 January 2018 to 31 December 2018 (stub period from IPO date to 31 December 2017 is excluded)

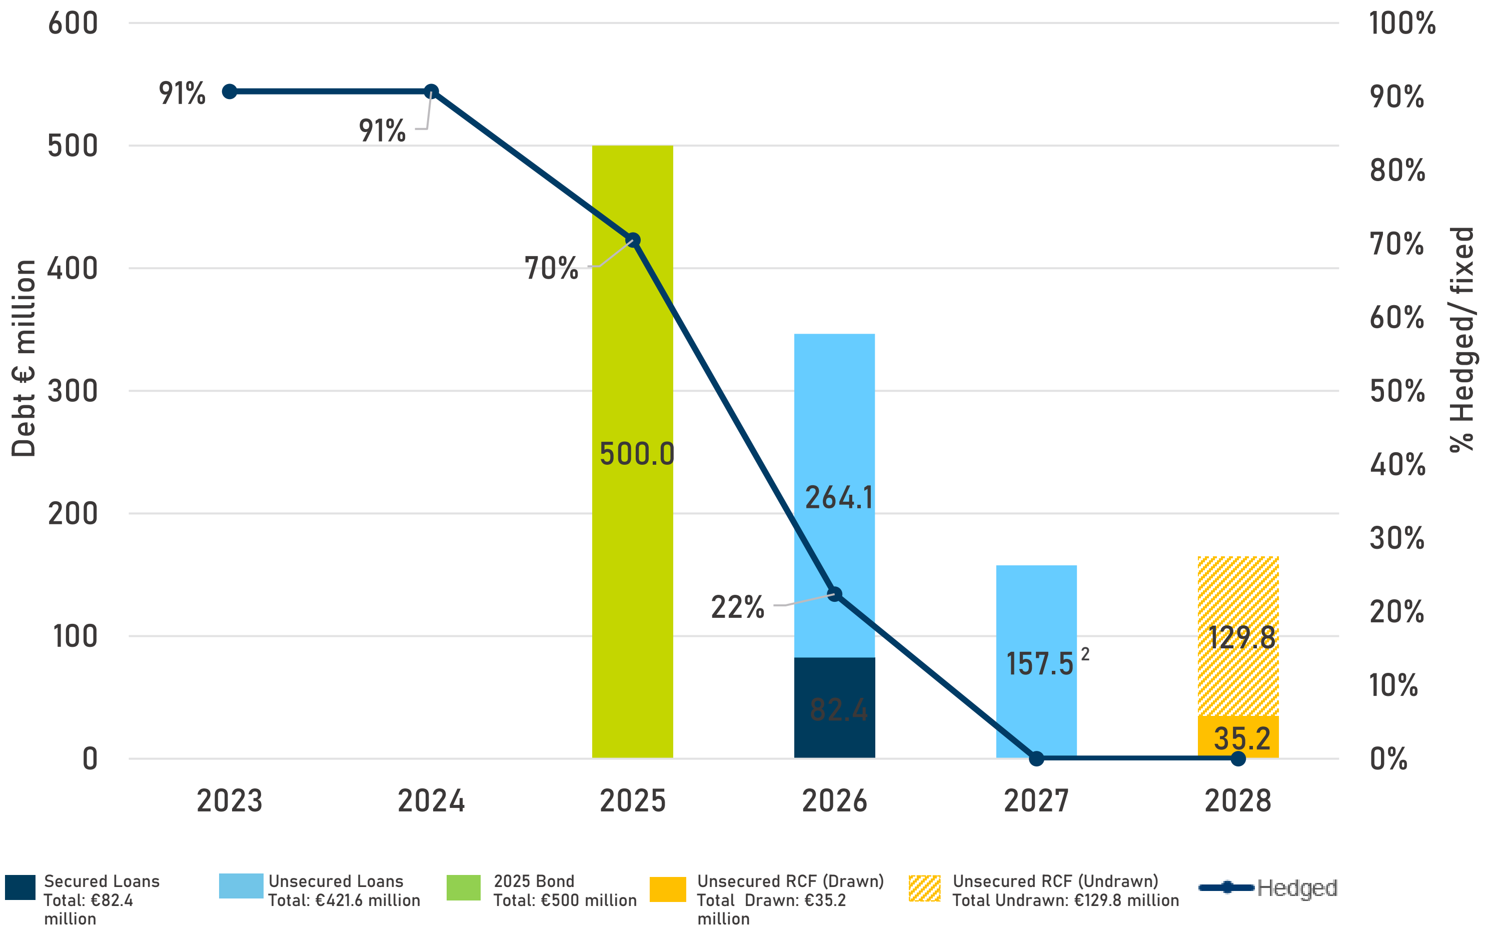
Continued focus on capital management to minimise rise in interest rates

€336 million of new facilities signed in 3Q 2023; no debt expiring until November 2025

Debt maturity[1] and percentage hedged / fixed rate as at 30 September 2023



1. Excludes S$100 million of perpetual securities (classified as equity instruments) issued in November 2021
2. The Term Loan Facility has an initial term of 2 years with the option to extend for up to another 2 years at the Borrower's request

Commentary

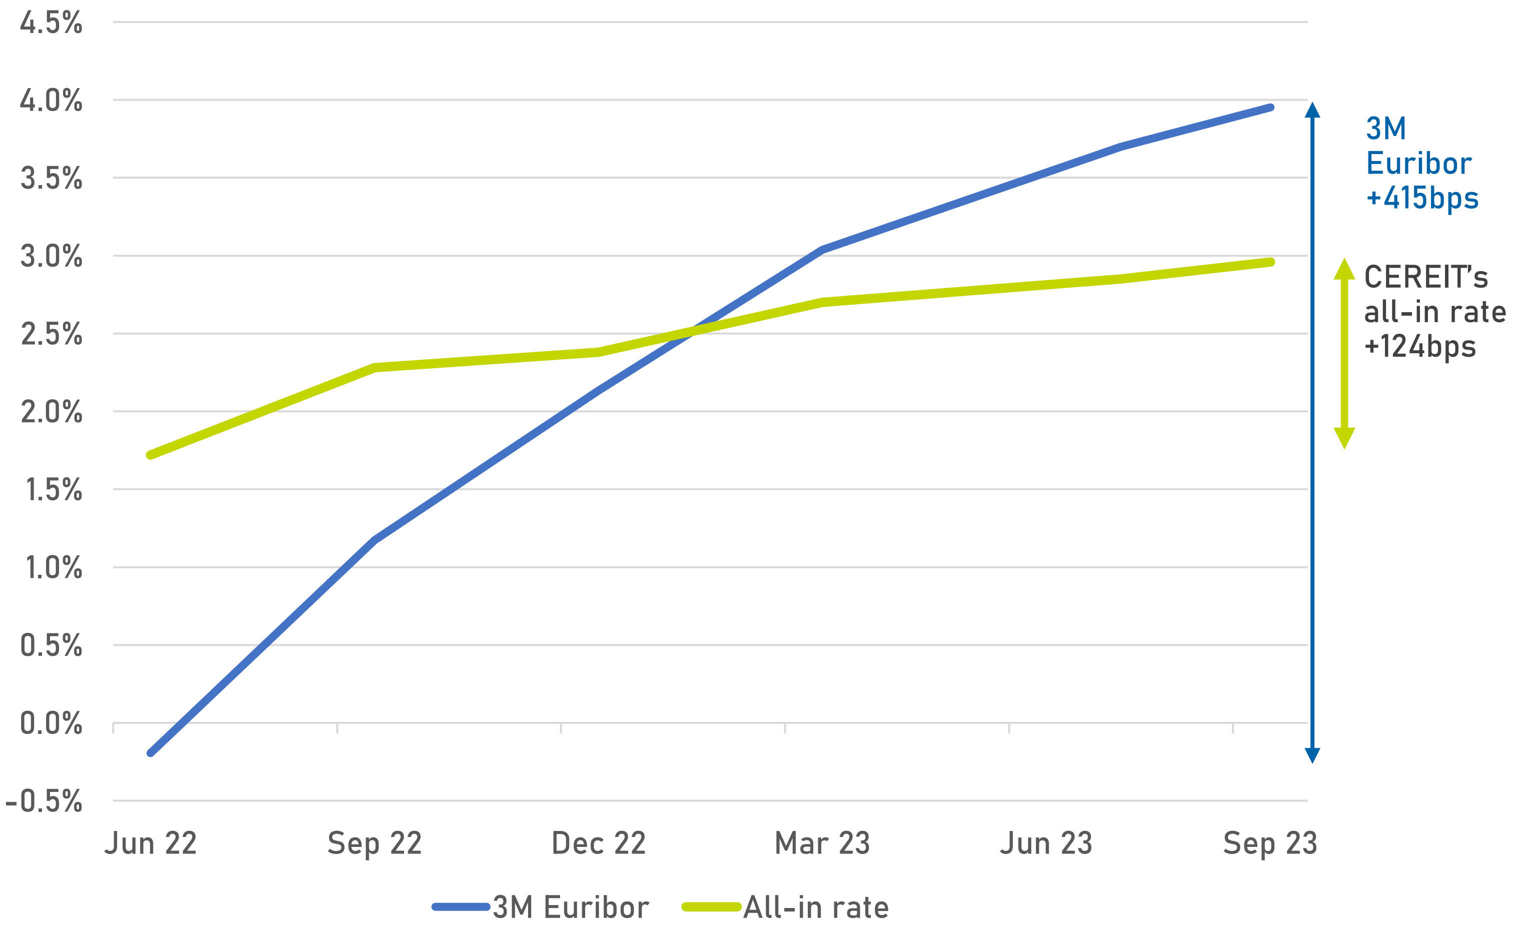
- New sustainability-linked facilities for a total of €336 million signed in 3Q 2023
- RCF accordion has a further commitment of €35 million following credit committee approval by an existing lender which will take the RCF to a total commitment of €200 million
- Higher interest costs (YTD 2023 vs YTD 2022) are a result of the following:
    - Higher interest rate on the 3-month Euribor (€9.6 million)
    - Higher margins from new facilities signed (€1.4 million)
    - Higher average loan balance (€0.6 million)

  Offset by:
    - Income from benefit from interest rate caps (€3.6 million)
    - Higher interest income (€0.6 million)

91% hedged / fixed minimises further impact from interest rates

3M Euribor has increased by more than 400 bps in just over a year

CEREIT's all-in interest rate vs. 3M Euribor



Commentary

- CEREIT has been actively managing interest rate risk with hedged and fixed rate debt
- CEREIT's all-in interest rate of 3.0% as at 30 September 2023 has increased by less than one-third of the move in 3M Euribor
- 91% of debt is fixed / hedged for an average of 2.14 years as at 30 September 2023
- A European Central Bank Governing Council member was recently quoted as saying that they were "finished with the process of raising interest rates for now as inflation is falling now"

Capital metrics

Proforma net gearing including cash receipts from the sale of Viale Europa 95 on 6 October 2023 would be 37.4%

	As at 30 Sep 2023	As at 31 Dec 2022	Debt covenants

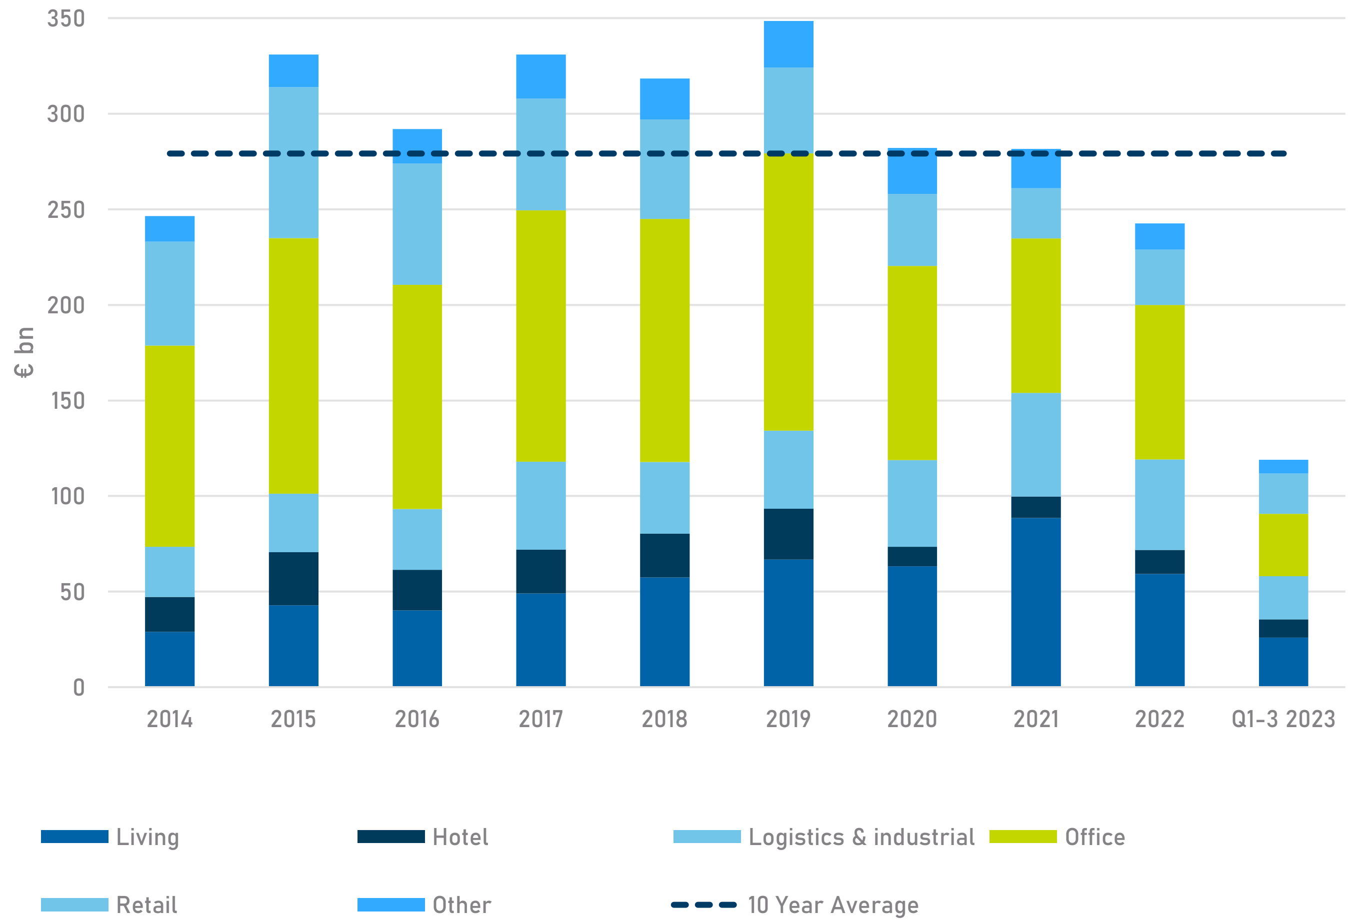
Low European real estate investment volumes

3Q 2023 European commercial property acquisitions fell to the lowest level since 2010

Investment volumes by sector



Source: Real Capital Analytics, 3Q 2023

Commentary

- European commercial investment volumes are down 54% y-o-y so far this year. Q3 volumes were the lowest since 2010
- Offices are most impacted by falling liquidity with YTD volumes down 61% y-o-y. Q3 23 office deals were the lowest ever. A substantial price expectations gap exists between buyers and sellers
- Logistics transactions were down 58% YTD in Q3 23 but comparable to the pre-pandemic averages. Pricing expectations are more aligned and some markets like UK appear to have repriced with evidence of price and value stabilisation
- A pick-up in activity is not anticipated in the near-term. Market participants are seeking price certainty but given low liquidity and high finance costs which constrain deal flow and size, this is not likely to occur until 2024

Priorities ahead

Managing for continued higher rate environment, softening economy and valuations

Key priorities in 4Q 2023 and into 2024

Active asset management:

- Maintain high portfolio occupancy
- Drive positive rent reversion growth and capture inflation indexation
- Deliver fully-let current developments and AEIs
- Prepare further projects to rejuvenate and future-proof the portfolio

Proactive capital management:

- Minimise impact of higher interest rates on distributable income
- Focus on liquidity by preserving cash and maintaining sufficient committed undrawn debt facilities

Further divestments and asset recycling

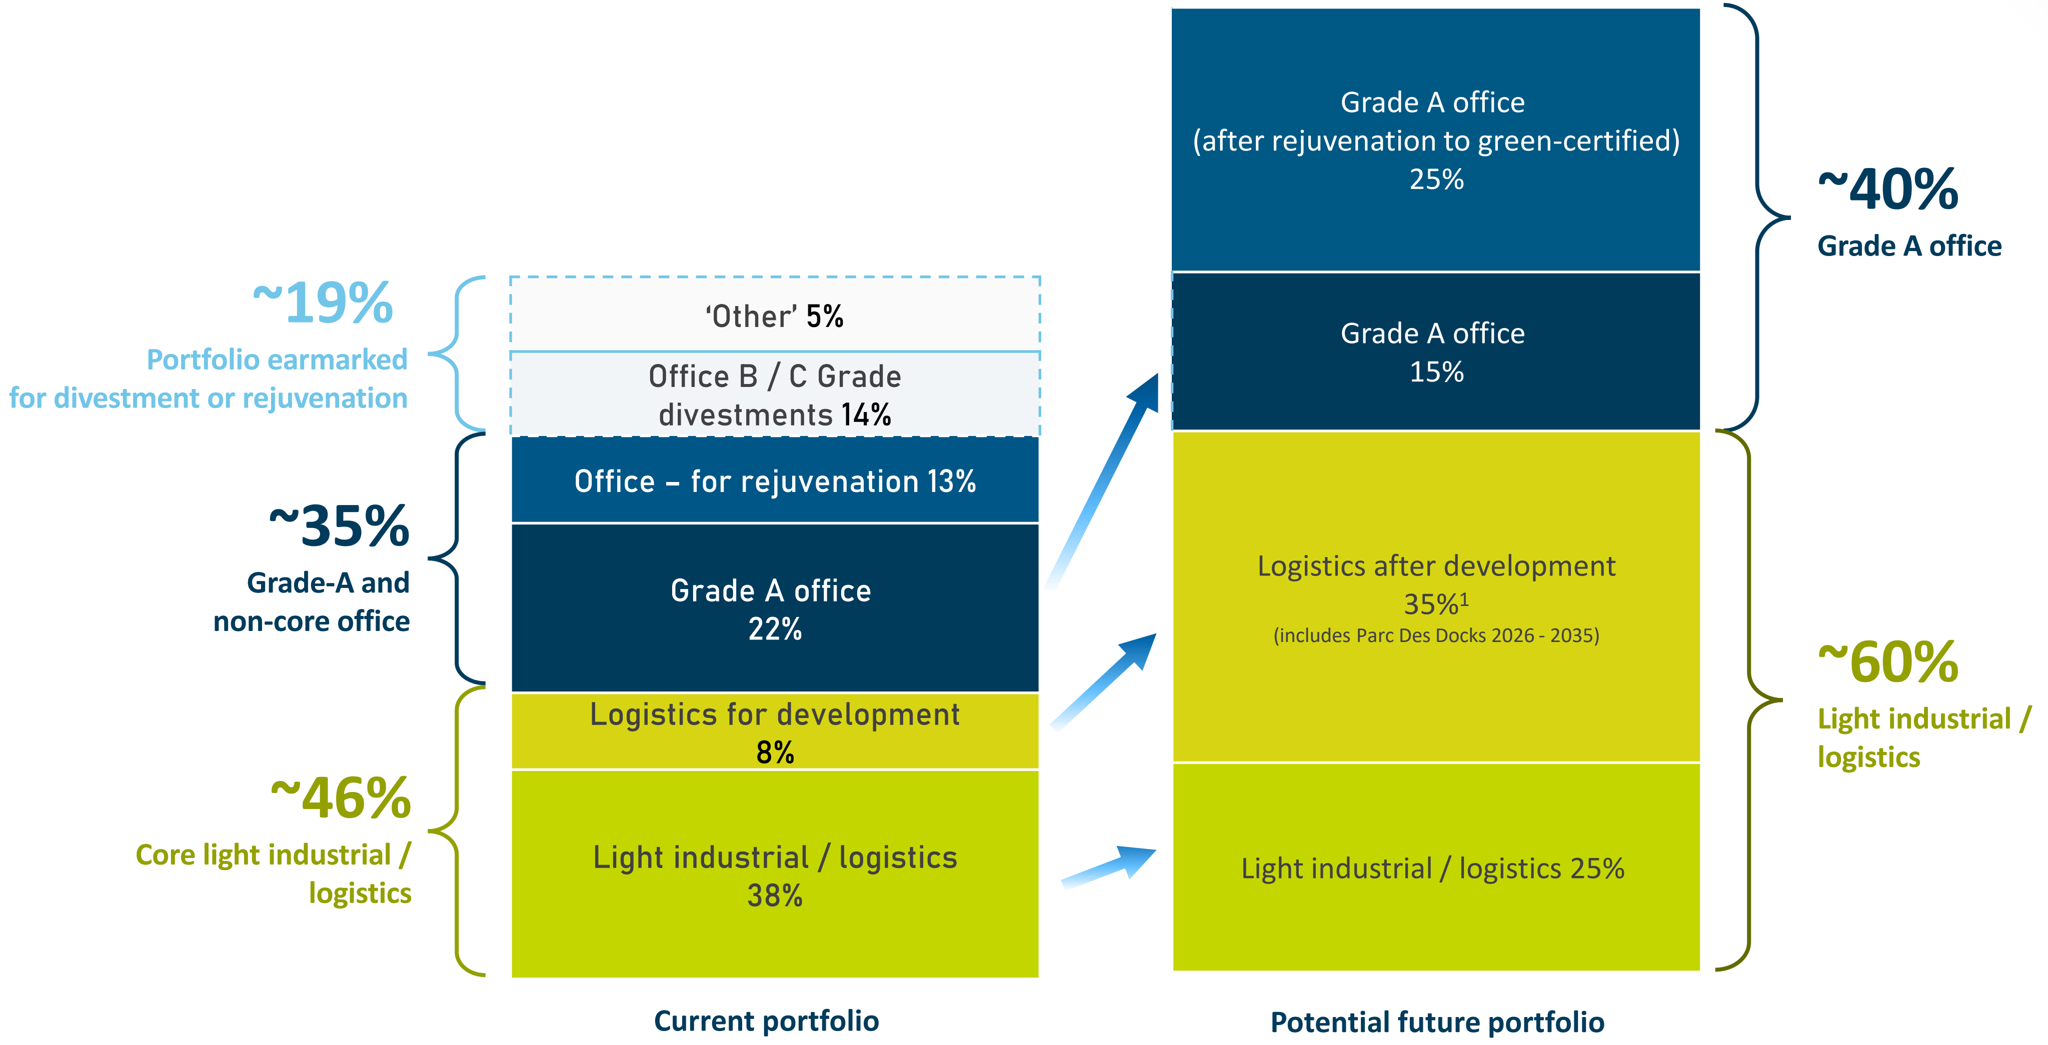
- Execute further €200 million divestments by December 2025
- Use proceeds judiciously towards partial debt repayment, Unit and/or Bond buybacks and funding of selective accretive AEIs and developments

Maintain Fitch investment-grade rating and maintain gearing within the Board's long term policy range of 35-40%

Appendix

Developments to enhance the portfolio funded primarily by divestments

~€400 million in non-strategic asset divestments will be staggered over the next two to three years to fund €250[1] million developments and maintain gearing within 35 - 40%



1. The Manager will monitor the development under contract to comply with the MAS' regulatory limits of 10% development as a proportion of total assets in any one year
